Associated Disorders in Glomerular Disease

Jefferson Schott, MD April 1996
Jeff Kaufhold, MD FACP 2012

	COMMON	UNCOMMON
IgA Nephritis		
	Henoch-Schonlein purpura	Ankylosing spondylitis
	Cirrhosis	Rheumatoid arthritis
		HIV
		Resp and GI cancer
		Celiac disease
		Dermatitis herpetiformis
Alports Disease		
	Thrombocytopenia (Epstein's syndrome)	
	Lens opacification, anterior lenticonus and cataracts	
	Deafness, Bilateral high frequency hearing loss	
	Leiomyomatosis	
	Thin basement membrane disease	
Membraanoproliferative GN		
	C3 nephritic factor	SLE, Cryoglobulinemia
	Cirrhosis	Leukemia, lymphoma
	Chronic Active Hepatitis B,C	Light chain deposition
		Down's syndrome
		Sarcoidosis
		Sickle cell disease
		Drug abuse (heroin, Talwin)
		Partial lipodystrophy
Minimal Change Disease		
	Hodgkin's disease	Carcinoma, bee stings
	NSAID's	other lymphoproliferative dz
		Drugs: ampicilin, penicillin
		Trimethadione, mercury, lead
		Mononucleosis, HIV
		Immunizations, obesity.
FSGS		
	IV heroin abuse (nephropathy)	unilateral renal agenesis
	HIV nephropathy (different ultrastructurally)	sickle cell
		Congenital cyanotic heart dz
		Renal ablation, aging

Membranous GN

Infections: Syphilis, Hepatitis B, Leprosy, TB, malaria, schistosomiasis, Filariasis, scabies
Solid tumors: lung, breast, kidney, colon, stomach, esophageal, melanoma
Non-hodgkin's lymphoma, Leukemia
Drugs: Organic gold, D-penicillamine, captopril, mercury, probenecid, trimethadione.
Collagen vascular disease/Immunologic conditions:
Rheumatoid arthritis most commonly,
sjogren's syndrome, SLE, Mixed connective tissue disease, dermatomyositis, sarcoidosis, Hashimoto's Thyroiditis, Dermatitis herpetiformis, Myasthenia gravis, Guillain-Barre' syndrome, Weber-Christian panniculitis, bullous pemphigoid.

Miscellaneous: Sickle cell, Fanconi's Syndrome, sclerosis cholangitis, systemic mastocytosis, Kimura's disease, Gardner-Diamond syndrome, diabetes mellitus.

Cryoglobulinemia

Hepatitis C

Amyloid Nephropathy

Hodgkin's disease
Primary amyloidosis (AL amyloid)
Secondary amyloidosis (AA amyloid): chronic infections/inflammation
Including RA, ankylosing spondylitis, TB, osteomyelitis, IV drug abuse.
